

# Private health insurers

The BAAC keeps an 'open' list of private health insurers which is frequently reviewed and updated, based on reports from patients and members and also on our comprehensive phone round of all of the known providers. Below we have shown the current position. The list is growing, with the significant addition of WPA - the result of a single-handed campaign by a single-minded patient! The two market leaders, BUPA and AXA/PPP, still offer very limited cover, and we continue to make our case to them to extend what they offer to patients.
